

## Template: Measure quality of services after completion

List below the methodology you will use to measure the quality of your service in the first column of the table below. Annotate the results of the measurements in the second column. Include the date of control and the signature of the person that performed the measurement in the third column of the table. Refer to the info sheet for further explanations, guiding questions and examples.

Methodology to measure quality of service	Results	Date and signature
